

Innovation Portal

A governed platform for idea intake, committee decisioning, admin control, and leadership visibility

Satyajit(MMV8402)/ Roshan(MMV8940)/Rashmi(MMV7514)

April 22, 2026

...MassMutual

175
YEARS

A legacy of purpose.
A future of possibilities.

A single platform for governed innovation

Innovation Portal unifies ideation, evaluation, and delivery inside one audit-logged workflow — so good ideas don't stall in spreadsheets, they evolve to reality

01

Ideation on rails

Guided submission flow with eligibility checks, Project Outcome, and effort sizing baked in.

02

Transparent evaluation

Committees score against a shared rubric; participants see stage, feedback, and next step.

03

Delivery to showcase

MVP deliverables, demo slots, and leadership recognition close the loop on every idea.

Four audiences, one governed spine

Each role gets a purpose-built workspace — while submissions, scores, and decisions flow through the same system of record.

PARTICIPANT

Submit · Track · Deliver

Guided intake, live status, and MVP deliverable checklist.

COMMITTEE

Screen · Score · Decide

Rubric-based scoring, calibration views, and clarification loops.

ADMIN

Configure · Govern · Publish

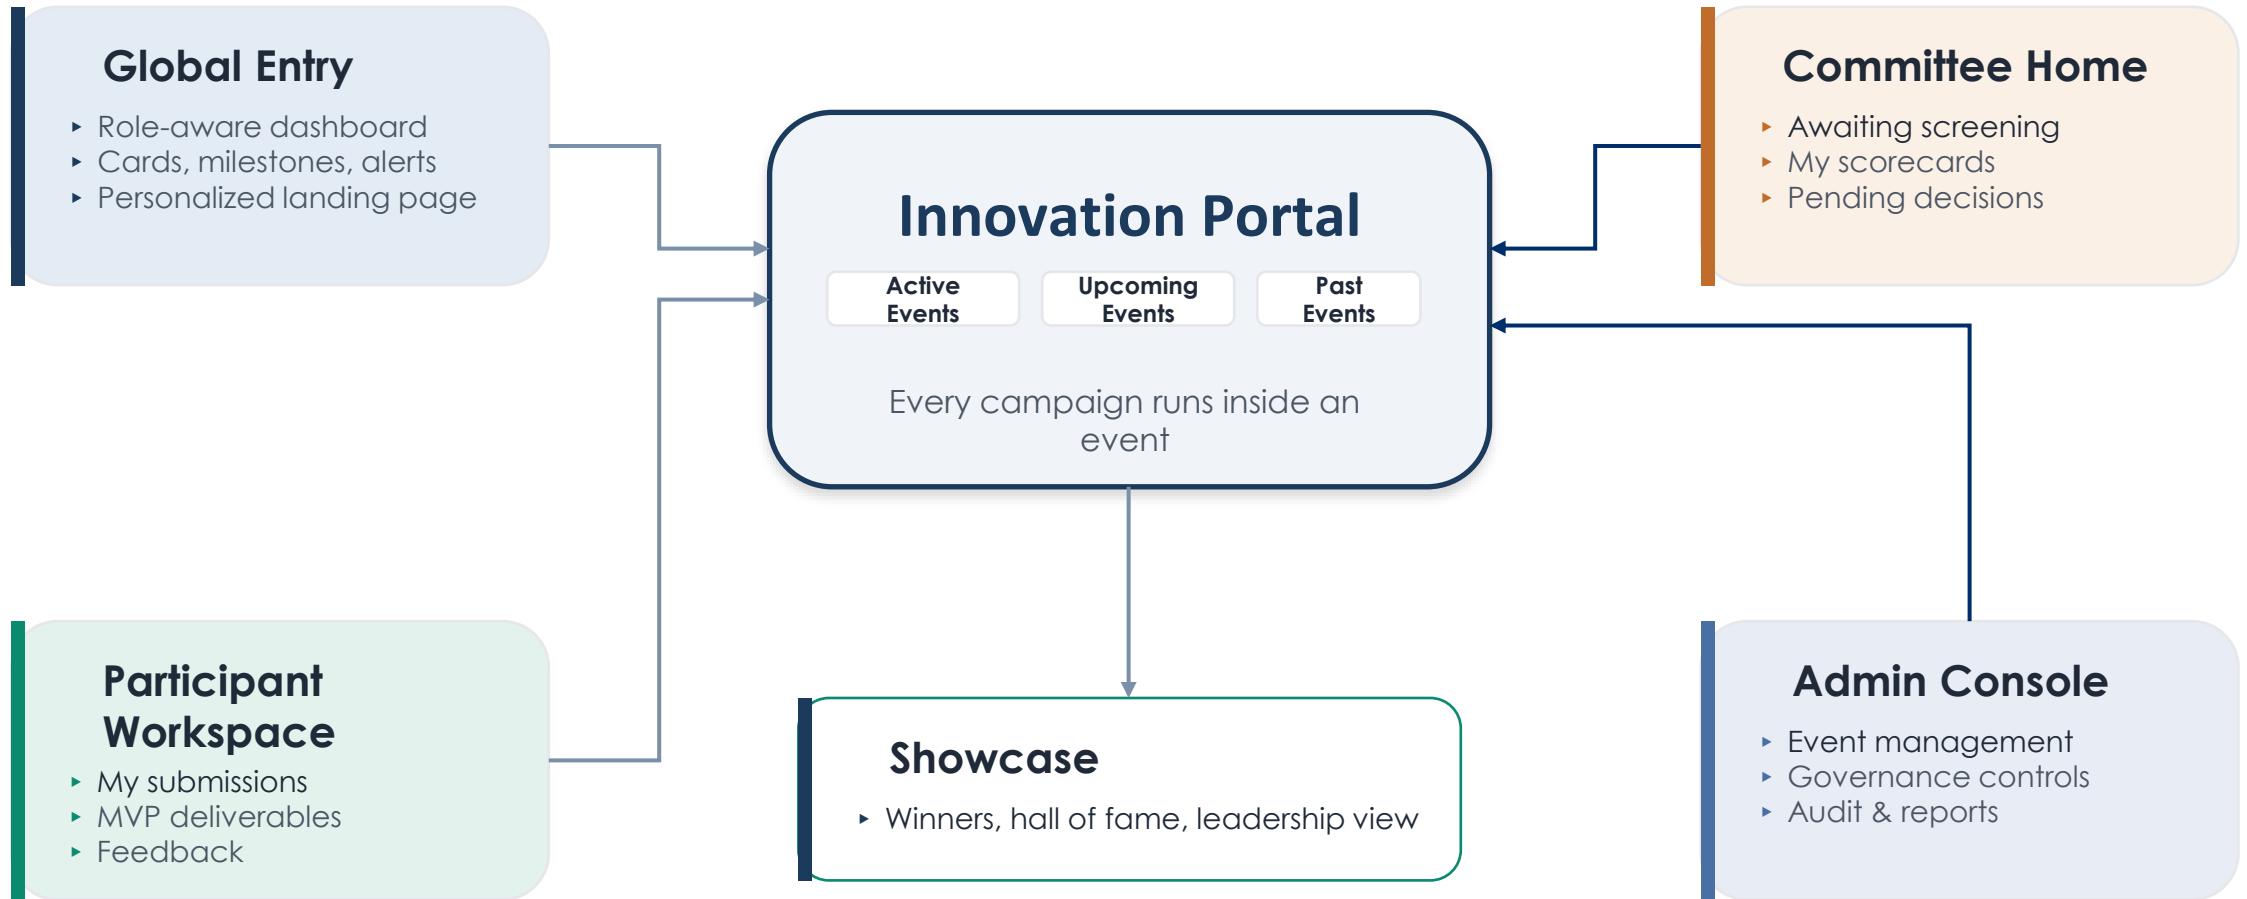

Event setup, access control, and publishing of outcomes.

LEADERSHIP

Outcomes · Trends · Recognition

Portfolio dashboards, trend lines, and showcase moments.

Submit an Idea — Claims 2026

Solution

Step 3 of 5 · Describe the proposed approach

Proposed solution *

A lightweight agent that ingests FNOL narratives, classifies urgency, routes to the right adjuster, and drafts a first response for review.

Key capabilities

- Narrative summarization
- Severity scoring
- Draft-response generator
- Integration with existing claims core

Estimated effort

Medium · 1 squad · 10 weeks ▾

Theme / Impact area

Claims

CX

Automation

Attachments

Drop a 1-pager, mock, or short video here — or click to browse (PDF, PPTX, MP4 · max 50MB)

Guidelines

Keep it concrete. A strong solution names users, workflows, and the one measurable outcome you would change.

Example (strong)

Draft first response to low-severity FNOLs within 3 minutes, improving NPS by 4 pts and saving 6 FTE-years.

Eligibility

- ✓ Problem defined
- ✓ Sponsor named
- ✓ Not in-flight elsewhere

Save draft

e. A future of possibilities.

Summary

Why now

- Ideas are captured through fragmented channels and inconsistent workflows
- Committee screening and scoring are difficult to standardize across events
- Leadership lacks a clear view of stage progression, pending decisions, and outcomes

Innovation Platform

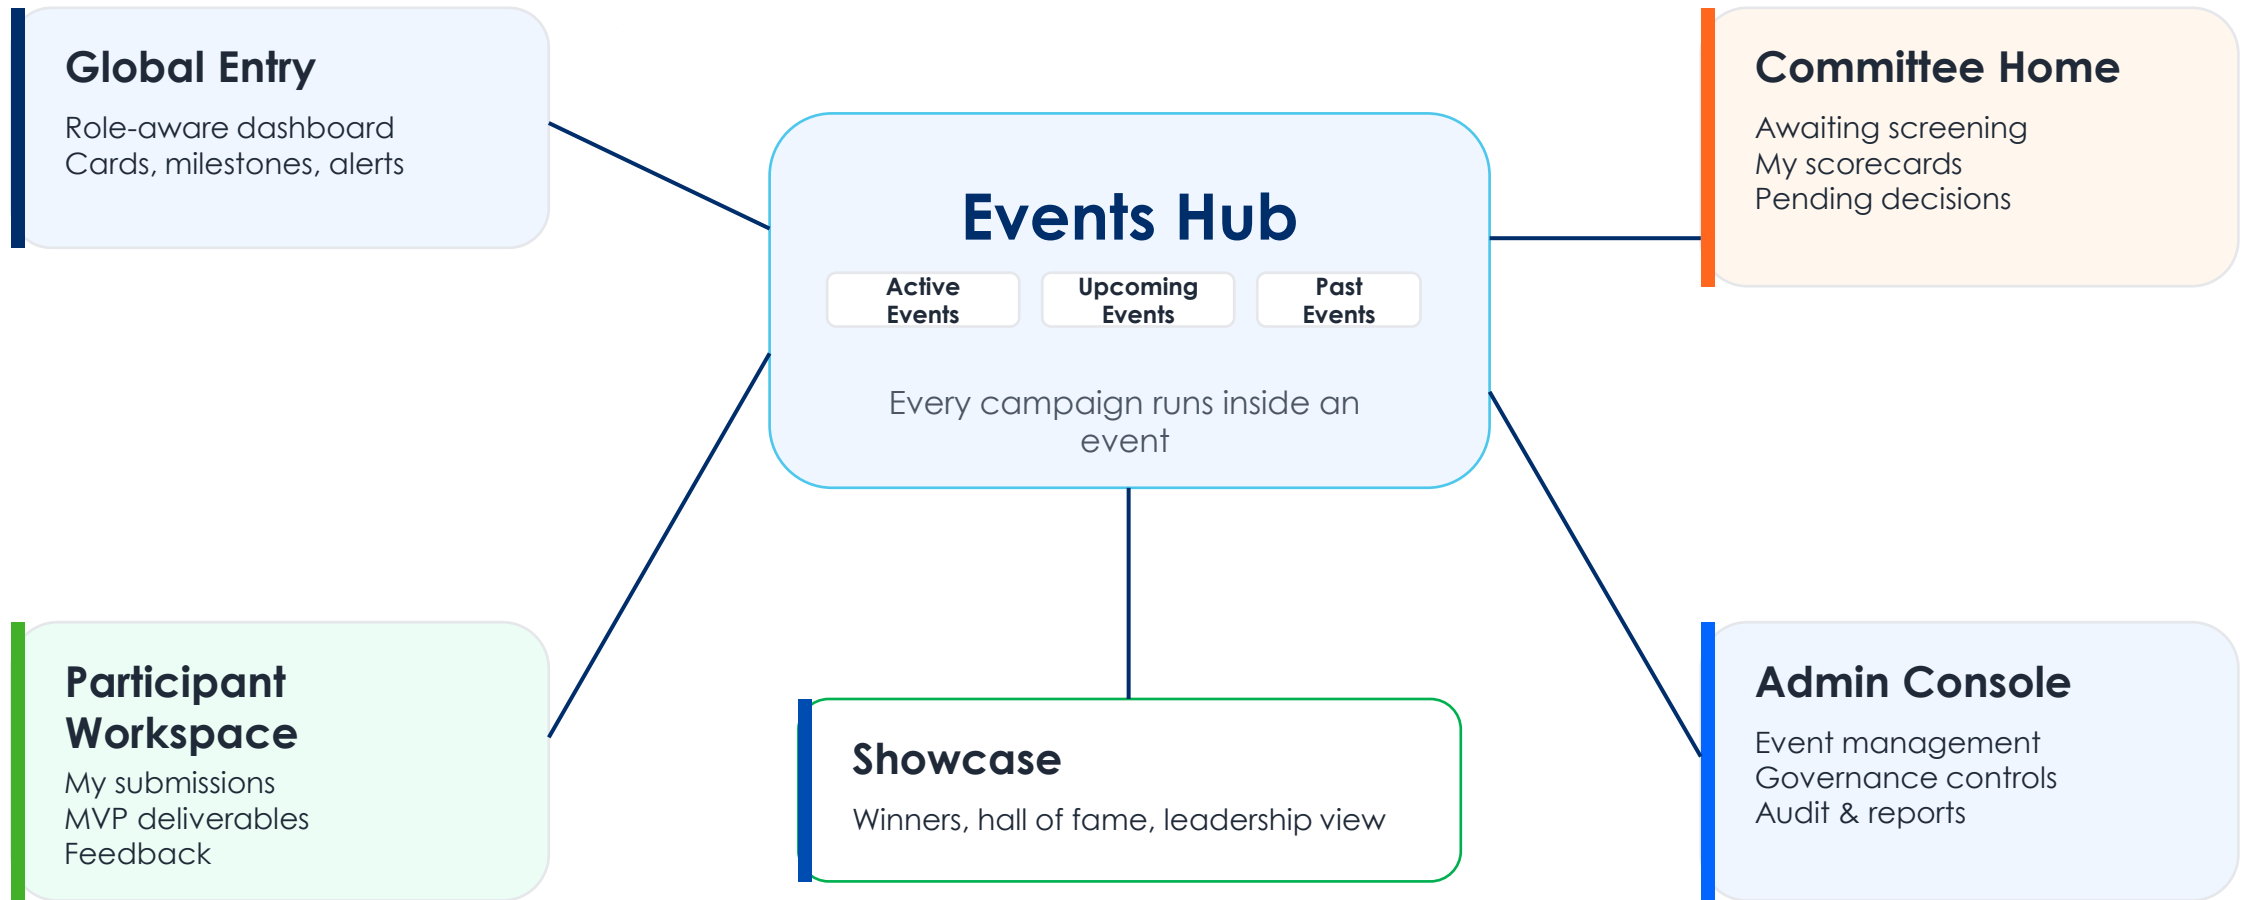

- An event-centric innovation platform rather than a “My Ideas” app
- A role-aware operating model for participants, committee members, administrators, and leadership
- A phase-driven workflow with governance embedded at every transition

End Goal

- Single view of active events and overall funnel health
- Confidence through visible rules, clearly defined roles, and auditability
- A repeatable model that can scale across events and business areas

Operating Architecture

End-to-End Innovation Flow

Role	Launch	Submit	Screen	MVP / Demo	Evaluate	Publish
Admin / Event Owner	Create event & rules	Open intake window	Route to screeners	Approve demo slate	Finalize results	Publish winners
Participant	Receive event launch	Submit idea	Respond to clarifications	Prepare MVP assets	Receive decision	View results
Committee	Review calendar	—	Screen against criteria	Attend demos	Score / recommend	Close actions
Leadership	See active events	Monitor intake	Review funnel health	Observe finalists	See outcomes	Recognize winners

Governance Built into the Workflow

Phase	Owner	Key decision	Visibility	Evidence retained
Submission	Participant / Admin	Complete intake & validate eligibility	Submitter + admins	Timestamp, completeness check
Screening	Committee	Advance / hold / reject	Role-based shortlist view	Reviewer, rationale, outcome
MVP / Demo	Participant / Admin	Approve demo readiness	Finalist slate + schedule	Deliverables, readiness status
Evaluation	Committee	Score and recommend	Scorecards and comments	Scores, comments, consensus trail
Results	Admin / Leadership	Publish outcomes	Winners + showcase	Decision log, publish date

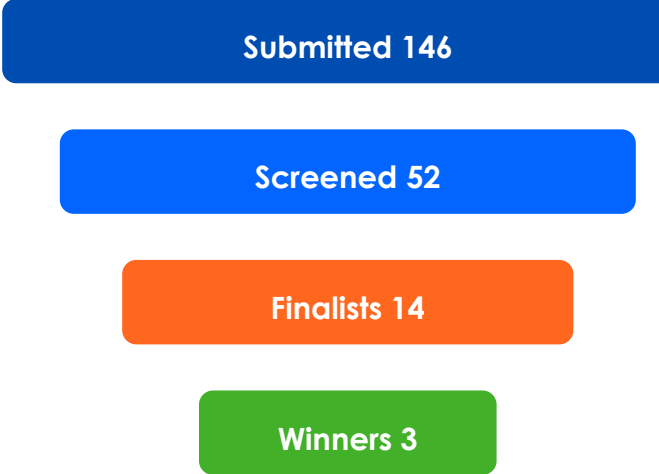

Governance is not an overlay. It is designed into the stage model.

Leadership View and Business Value

“Leadership sees a managed innovation pipeline — not a collection of disconnected ideas.”

Pipeline at a glance

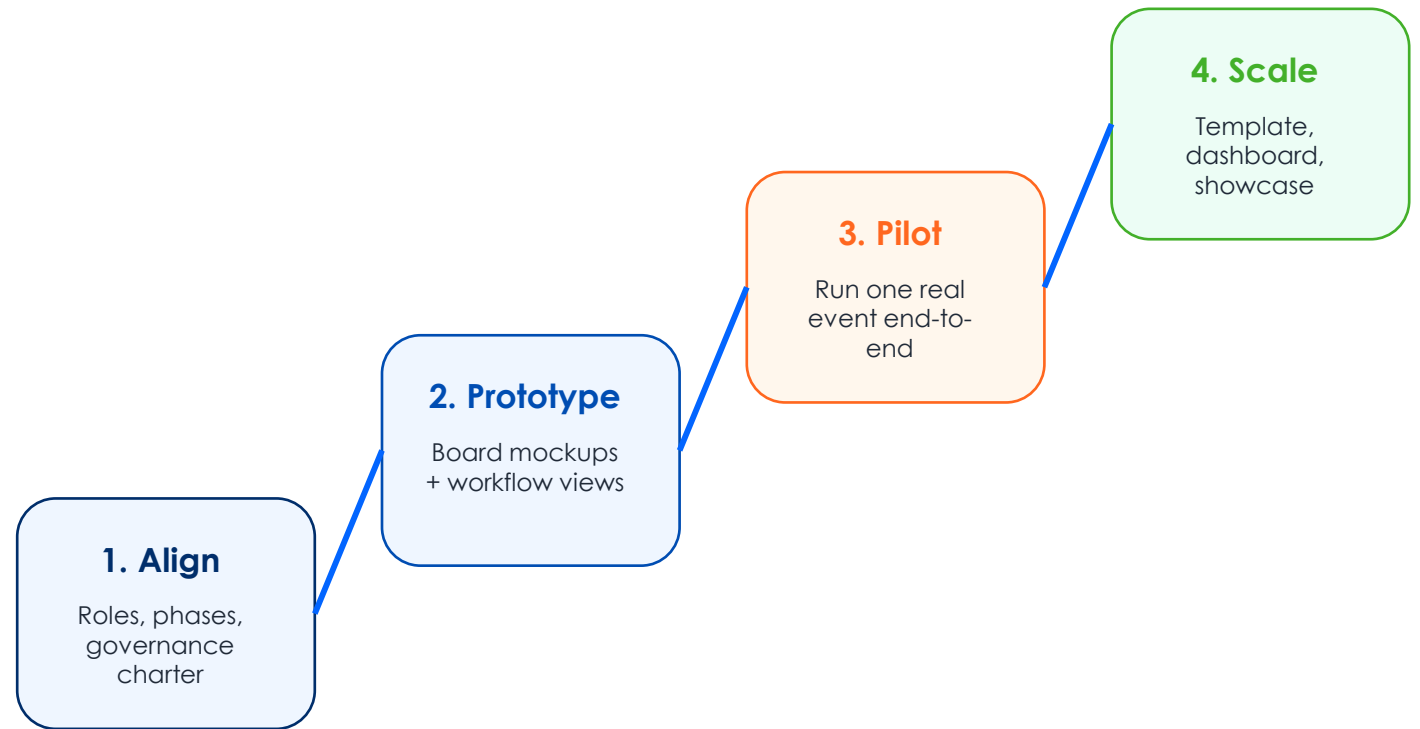

What the board gains

Outcome-level visibility across active events. Visibility into bottlenecks and pending decisions. Confidence that rules, roles, and evidence are preserved. A scalable operating model that reinforces innovation culture.

Idea Recommendation

Recommendation

Approve the concept direction: event-centric, role-aware, and governance-led.
Validate with one pilot event using the defined role model and stage workflow.
Use the pilot to finalize the object model, reporting layer, and governance charter.

Decision ask: proceed to pilot design using the event model, role-specific workspaces, and governance framework presented here.
