Discussion: What we learned

Q&A

What you will learn

By the end of this session, you will be able to use Microsoft 365 Copilot confidently, responsibly, and in ways that save you time every day.

Understand what Copilot is and how it works across your M365 apps

Write effective prompts that produce relevant outputs the first time

Use Copilot across Outlook, Word, Excel, PowerPoint, OneNote and Teams

Apply human judgment. Review and validate every output

M365 Copilot overview

Why M365 Copilot?

Build foundational AI capability M365 Copilot is available to MassMutual employees to support secure, governed AI use grounded in role-relevant access to enterprise data and aligned to existing work.	Optimize workflow productivity Copilot works across familiar Microsoft tools to reduce manual effort, summarize complex information, and accelerate planning, analysis, and communication.	Drive enterprise adoption By embedding AI into daily workflows, MassMutual can scale adoption and balance productivity gains with strong data protection and oversight.
---	--	---

Copilot is an AI assistant powered by large language models that you can interact with through chat or directly within Microsoft 365 applications.

Copilot works for MassMutual because:

- it's secure
- it's connected to internal data sources
- it's already integrated into our 365 applications
- it has state-of-the-art generative AI chatbot capabilities

X

MassMutual

Before we start...

What comes to mind when you hear the words "Artificial Intelligence"?
No right or wrong answers. We'll debrief together before moving on.

AI IS

- ✓ A tool that uses **pattern recognition** to generate relevant, useful responses based on what it has been trained on
- ✓ An **assistant**, it helps you work faster, draft better, and find what you need more easily
- ✓ Able to **make suggestions and recommendations**, giving you a strong starting point, not a finished answer
- ✓ Guided entirely by its **training data and your prompts**, the more context you give it, the better the output
- ✓ A tool that improves with **clear, specific prompts**, how you ask shapes what you get

AI ISN'T

- ✗ Able to **think, reason, or form opinions** the way a human does, it predicts likely responses, not correct ones
- ✗ A **replacement** for your expertise, judgement, or professional knowledge
- ✗ Able to **take accountability** for its outputs, that responsibility always stays with you
- ✗ Guided by **morals, values, or common sense**, it does not know what is right for your context unless you tell it
- ✗ Always accurate, outputs can be **fluent but wrong**, so review before you use or share anything

The bottom line.

Copilot is a powerful assistant, and you are the expert. The best results come from the two of you working together, with you always in the loop.

Constantly evaluate outputs

Be the Human-in-the-loop to verify, review, and validate AI outputs before using them. It is **crucial to validate AI-generated content** to mitigate errors, biases, and inaccuracies, ensuring the **final output is reliable and trustworthy**.

Take a tour of Copilot Chat

Take a tour of Copilot Chat

The image shows a tablet displaying the Copilot Chat application. The interface includes a sidebar on the left with a 'New chat' button, a search bar, and a 'Library' section. The main area displays a 'Welcome, how can I help you?' message. At the top, there are tabs for 'Work' and 'Web', and a status bar showing 'Auto' and a green checkmark. A 'More Options' menu is open on the right, showing 'Recent pages', 'About', 'Scheduled prompts', 'Send feedback', and 'Settings'. The 'Settings' menu is expanded, showing 'Copilot response includes:' with a toggle for 'Web search'. The bottom of the screen features a 'Message Copilot' input area with a plus icon, a microphone icon, and a 'Dictate your prompt' button. Below the input area are buttons for 'Files', 'Emails', 'People', 'Meetings', and a 'See more' button. Callouts provide detailed instructions for each of these features.

Copilot advanced search

What are the benefits?

- Unified search across emails, files, chats, and meeting content
- AI-powered relevance ranking surfaces the most useful results first
- Smarter filters like Modified, Type, and Person streamline narrowing down results
- Context-aware insights from your organization.

Key Benefits

- Quickly locate exactly what you need, even across large volumes of content
- Personalized results based on your role and recent work
- Consistent search experience across M365 apps

How to access your Search:

1. Open Copilot Chat app
2. Click Search in the left menu pane
3. Perform a search to see Modified, Type, and Person tabs appear.

Pulse check

Where does your time go?

Activity - Find your Copilot starting point?

Step 1: Individual Prompt (1 minute)

Open Copilot Chat and paste the prompt below. It will surface practical, app-by-app ideas across your day-to-day work.

Prompt: *"Identify common time-consuming or repetitive tasks in day-to-day work — such as drafting communications, managing information, organizing meetings, and preparing materials. For each task, explain how Microsoft Copilot can help across Outlook, Word, Excel, PowerPoint, OneNote and Teams. Keep the response high-level and practical."*

Copilot will suggest ideas across:
Outlook, Word, Excel, PowerPoint, OneNote, Teams

Step 2: Personal Filter (30–60 seconds)

Follow up in the same Copilot Chat conversation to make the output personal to your role.

Prompt: *"From the list above, identify the 1–2 tasks most relevant to my role today. Briefly explain why these matter most in my day-to-day work."*

Current application usage

Copilot for faster responses, cleaner outputs

Recognize where your time goes and where Copilot can give it back.

Where time is
spent today

Drafting and managing emails

Writing, summarizing, and following up on lengthy email threads across teams and stakeholders.

Preparing for and following up after meetings

Reviewing notes, drafting agendas, and capturing actions across multiple conversations.

Writing and formatting documents

Producing reports, briefings, and memos from scratch — adjusting tone and format for different audiences.

Finding and summarizing information

Searching through documents, emails, and notes to pull together what's relevant before acting.

Building presentations and briefing materials

Structuring slides, refining messaging, and tailoring content for different audiences and purposes.

Where M365 Copilot can help

Set expectations and define “what success looks like.”

Copilot Chat

- Draft, summarize, and refine content for any task or audience.
- Iterate on outputs until ready to share — always with human review.

Excel

- Explain data, suggest formulas, and support spreadsheet work.
- Reduce time on data prep and calculations while validating results.

Outlook

- Use Copilot to draft emails, summarize meetings, and manage your inbox.
- Catch up quickly on conversations you've missed.

Word

- Turn notes and source material into a structured first draft.
- Revise for clarity, consistency, and the right tone.

PowerPoint

- Turn notes or documents into a first draft of slides.
- Improve structure and clarity for shareable narratives.

OneNote

- Summarize and organize notes from meetings, research, and documents.
- Surface what's relevant and refine findings before sharing.

Your repeatable workflow

Move from clear questions to decision-ready outputs

PLAN THE WORK

ORGANIZE YOUR WORK

RESEARCH & ANALYZE

COMMUNICATE & ACT

What this looks like in your day

Plan the Work

- Clarify the ask, desired outcome, and next steps
- Define what "done" looks like
- Use Copilot to outline your approach

Organize Your Work

- Summarize notes, emails, or inputs to stay on track
- Identify what matters most and what to prioritize next
- Clarify before taking action

Research & Analyze

- Gather inputs, summarize documents and data
- Identify patterns, risks, and gaps
- Organize findings in OneNote

Communicate & Act

- Turn insights into clear, usable outputs
- Draft emails, summaries, or presentations
- Refine content before sharing

Prompting 101

Anatomy of a prompt

GOAL

What response do you want from Copilot?

Generate an executive summary to...

CONTEXT

Why do you need it and who is involved?

...prepare me for my upcoming meeting on the <initiative or project>.

SOURCE

Which information sources or samples should Copilot use?

Focus on articles written in the last 3 weeks .

EXPECTATIONS

How should Copilot respond to best meet your expectations?

Use simple language so I can get up to speed quickly.

Workflow prompt library

Example Prompt Library

Clarify and plan

"I need to work on [task or project]. Here is the context: [brief background]. Help me clarify what I'm trying to achieve, identify what I need to get started, and outline a logical approach I can follow."

Triage e-mails

"Analyze my inbox and create a prioritized list of emails that need my attention today, based on deadlines and sender importance."

Work with data

"I have a spreadsheet with [describe the data]. Explain what the data shows, suggest any cleanup or formatting steps, and help me answer this question: [specific question or metric]."

Draft a document

"Using the following notes or summary: [paste content], draft a clear and well-structured [document type, e.g. briefing, report, email]. Write it for [audience] and keep the tone [professional / concise / accessible]."

Communicate and present

"Create a first-draft presentation based on this content: [paste summary or document]. Organize it into a clear storyline, highlight what matters most, and tailor the message for [audience]."

Capture and organize notes

"Summarize the following notes or content: [paste notes or context]. Highlight the key themes, decisions made, and any follow-up actions. Organize the output so I can reference it easily."

∴ MassMutual

Pulse check

How long does it take to
triage your inbox?

Communicate and collaborate in Outlook

Summarize messages & threads

Quickly distill lengthy conversations into clear, actionable insights.

Copilot helps you quickly extract key information and action items from long email threads. It identifies who said what and includes annotations that show exactly where in the thread each detail came from.

To summarize a message:

1. In Outlook, open the conversation you want to summarize.
2. Select **Summary by Copilot** (or it may appear as **Summarize**) at the top of the email thread.

A blue rectangular button with a white icon of two overlapping document pages and the word "Summarize" in white text.
3. Copilot will scan the thread, identify key points, and generate a summary.
4. The summary will appear at the top of the email and may include numbered citations. Clicking a citation will take you directly to the corresponding message in the thread.

Triage your inbox with Copilot

Turn email overload into a prioritized action list that is about your responsibilities first.

1. Open a folder in **Outlook**.
2. Select the Copilot icon in the ribbon.
3. Scope to what actually needs you. Cut the noise. Filter for emails sent directly to you — not threads where you're just CC'd.

Prompt: “Summarize emails sent directly to me in this folder. Group by urgency and flag anything needing a response.”

Follow up prompts:

Prompt: “Turn this into a table: sender, subject, what's needed from me, priority (High / Medium / Low).”

Prompt: “Using the table above, create a task list. For each item: what I need to do, and suggested urgency.”

Copy to: OneNote or Teams

Draft an email from Copilot

Copilot Chat can recognize an email drafting request and open Outlook with a prefilled draft from the chat prompt.

Where it's available

- M365 Copilot Chat
- Outlook (via handoff from Copilot)
- Visibility may vary by tenant as the feature continues to roll out.

How to use it:

1. Launch Copilot Chat app.
2. Use a clear prompt such as:
"Draft an email in outlook to the project team summarizing this week's updates and next steps."
3. **Review the Copilot response:** Copilot will generate the email content and detect that it should be sent as an Outlook message.
4. Select the option to 'Open'. The email will appear pre-filled with the suggested subject line and body text, ready for review and editing.

OR

Select 'Send' to send the email directly from Copilot Chat.

5. Make any necessary changes, add recipients, and send the email as you normally would.

Write in your voice

Turn email overload into a prioritized action list that is about your responsibilities first.

Set Copilot to match your writing style in Outlook

Reference my last 20 emails and draft directions to give to Copilot that describe my writing of emails.

Step 1: Define your email writing style.

1. Open [Copilot chat](#) via web.
2. Prompt Copilot **“Reference my last 20 emails and draft directions to give to Copilot that describe my writing of emails.”**
3. Alternatively prompt reference specific emails or files and prompt **“Based on this reference, draft directions to give to Copilot that describe my writing style.”**
4. Copy the results 

Step 3: Use Copilot to draft emails that work.

How: Click **Draft with Copilot**

Say what the email's about, who it's for. **Example:**

“Follow-up to Project team. Thank them, recap key points, ask for next steps.”

Copilot writes it. You edit or regenerate.

- Chat
- Reply
- Summarize
- Prioritize
- Settings**

Step 2: Set Outlook to remember your style.

1. Open the new Outlook (Or Outlook on the web).
2. Click the **dropdown next to the Copilot icon**.
3. Select **Settings**.
4. Choose **Draft Instructions**.
5. Toggle on **“Use custom instructions when drafting email”** (it should turn blue).
6. In the prompt box, **describe your writing style**.
For example:
“Keep emails short and direct, with bullet points where they make sense. Use a friendly tone and sign emails with my first name.”
7. Click **Save**.

Time back to focus on what matters most

Try these prompts

1. Personalized recognition:

Write congratulatory email to /<person> celebrating their recent achievement. <add context>

2. Create action item lists:

Generate an updated action list from the last two meetings about <topic>.

3. Meeting delegation:

Which meetings on my calendar today has also been accepted by my direct reports

Schedule a meeting using Copilot

Copilot schedules meetings by checking availability, suggesting times, and creating the invite.

1. Launch the Copilot Chat app.
2. Enter a prompt such as:
 - “Block time to focus for an hour tomorrow.”
 - “Schedule a meeting with /<insert name(s)>”

Copilot will respond with a suggested meeting or appointment time.

3. In the scheduling card that appears, review Copilot's suggested time.
4. Once you have selected a time, click '**Send invite**' for the option.

Note: There is **no Copilot-specific limit** on how many people you can include when scheduling a meeting from **Copilot Chat**.

Practical guidance

- Copilot works best for **small to medium meetings** where it can easily find common availability.
- For **large distribution lists or town halls**, Copilot can still create the meeting, but time suggestions may be less precise and you may want to confirm details in Outlook afterward.

Demo

📶 Pulse check

When communicating across different audiences, do you use Word, PowerPoint or both?

Create and generate with Copilot in Word and PowerPoint

Where Copilot appears in Word

In Word, Copilot shows up as a built-in assistant that helps you create, rewrite, summarize, and design slides directly within the app.

The **Copilot Summary** button at the top of the document generates a quick overview to help you understand key points without reading the entire file.

The **Draft with Copilot** sparkle pencil helps you create new content from a prompt or refine selected text directly in the document.

The **Copilot button** in the bottom right corner for **Copilot Chat** or **Editing**, allowing you to ask questions or make changes across the entire document.

Edit with Copilot

When you highlight text, the **Edit with Copilot** button appears, allowing you to rewrite, refine, or adjust tone and clarity for just that selected content.

Prompting in Word

Structuring work with Copilot. In the example, let's focus on day-to-day work.

Compose: Click the **Copilot icon** in the bottom right to start a new draft.

Or describe what you want to write at the top of a new document.

+ Describe what you'd like to draft with Copilot ...

Refine with Copilot:

1. Highlight the text you would like Copilot to adjust > click the pencil icon to the left.
2. Describe the updates you would like or tune the update using the options available in the menu.
3. Replace the content.

Onboarding process

Pre-boarding: Before the new hire's first day, they receive a welcome email with essential information about the company, their role, and what to expect on their first day. This may also include completing necessary paperwork and setting up accounts for company systems.

Rewrite with Copilot < 1 of 3 >

Onboarding Process Pre-boarding: Before starting, new hires get a welcome email with company details, role info, first-day expectations, paperwork, and account setup instructions.

AI-generated content may be incorrect

Replace

Insert below

What do you want Copilot to change?

Onboarding process

Pre-boarding: Before the new hire's first day, they receive a welcome email with essential information about the company, their role, and what to expect on their first day. This may also include completing necessary paperwork and setting up accounts for company systems.

1. **Orientation:** On the first day, new hires attend an orientation session where they learn about the company's history, mission, values, and culture. They are introduced to key team members and given a tour of the workplace.
2. **Training:** New employees undergo training specific to their role. This may include job shadowing, attend workshops, and complete online courses. The goal is to equip them with the knowledge and skills needed to perform their job effectively.
3. **Mentorship:** Each new hire is paired with a mentor or buddy who provides guidance, support, and answers to any questions they may have. This relationship helps new employees feel more comfortable and integrated into the team.
4. **Check-ins:** Regular check-ins are scheduled with the new hire's manager to discuss their progress, address any concerns, and provide feedback. These meetings help ensure that the new employee is on track and receiving the support they need.
5. **Evaluation:** After a set period, typically 90 days, the new hire's performance is evaluated.

Create a Word document in Copilot Chat

Summarize, rewrite, and transform content instantly.

Draft from Scratch or Reference Files

1. Open the Copilot app.
2. Use a prompt such as:
"Draft a proposal in Word based on this file /<insert file>."
3. Attach or reference the file you want Copilot to use.
4. Copilot will generate a draft using the content from the referenced file.

Copilot

Coding and executing >

Coding and executing >

I've drafted a Word proposal based directly on the uploaded invoice, variance, and projection data and structured it as a professional, internal-facing document suitable for finance or leadership review.

Download the proposal [Financial Performance Improvement Proposal](#)

Accept or reject: Inline edits in Word

Accelerates first and second drafts, then keeps you in control with tracked changes for negotiations.

Step by step

- 1. Open the draft in Word and turn on Track Changes if you want all edits to be markups. **Review tab** → **Track Changes**.

- 2. Select text or a section. Click the **Copilot icon** and ask to “tighten, clarify, or convert to neutral tone for counterparties.” Copilot drafts suggestions in place.
- 3. Hover your cursor into the section you want to place the update.
- 4. Click the plus icon below Copilot's response to add it into the document.
- 5. Use Accept or Reject controls to keep or discard each edit. Choose All Markup or Simple Markup to manage visual clutter.

Prompts that work

- “Rewrite this paragraph to remove ambiguity and improve clarity.”
- “Tighten this section and make it clearer for a senior audience.”
- “Edit this section to align tone with the rest of the document.”

Verify

Scan track-change cards for each suggestion. Use “Compare” with your playbook clause if needed

Where Copilot shows up in PowerPoint

Move from a stack of pre-reads to a focused agenda, sharper talking points, and a follow-up email without the late-night rebuild.

Select the Copilot button in the bottom right to open Copilot Chat in PowerPoint. From there, you can use a suggested prompt or open the prompt pane to ask questions about your presentation or create a new one.

Copilot Rewrite icon

Opens **Copilot's text refinement options** in PowerPoint, so you can **rewrite, shorten, or adjust the tone** of selected text.

Allow editing in PowerPoint

Here to help you plan, build, revise, and polish presentations directly in PowerPoint (with less back and forth).

Use **Editing in PowerPoint** to make presentation-wide changes in one go. Tell it what you want updated across the deck, let it carry out the multi-step edits directly on your slides, then review and refine the story instead of spending time on repetitive cleanup.

What it can do

- Build and restructure slides: add new slides, update existing slides, reorder sections, and improve overall flow.
- Rewrite content for clarity and tone: tighten titles, simplify dense bullets, and adjust wording for different audiences.
- Make deck-wide formatting changes: align objects, standardize slide patterns, and apply consistent emphasis (like bolding acronyms).
- Create or improve visuals: generate images or replace existing ones to better support the message.
- Help you understand the deck quickly: summarize the presentation, answer questions about what is on specific slides, and surface key takeaways.

How to Access Editing in PowerPoint

1. Open your presentation in PowerPoint via web application.
2. Click **Copilot** in the bottom right to open the Copilot pane.
3. Above the prompt box, click the caret and select **Allow editing**.
4. Describe what you want to change in the deck and where to do it.

Example prompts:

- *"tighten the storyline"*
- *"simplify slide text"*
- *"rebuild slides 4–6 into a clearer flow"*

Everyday use case: Cleaner, clearer slide

Copilot's rewrite feature in PowerPoint can help you rephrase selected text based on length and tone.

Use case

You have a slide with long bullets copied from emails, meeting notes, or documents.

Steps

1. Select the **text box** you want to improve.
2. Click the **Copilot button** (pencil icon). 
3. Choose one of the available actions:
 - **Auto-rewrite** to review alternative versions of the text
 - **Condense** to make the content shorter and clearer
 - **Make professional** to adjust the tone for a work audience
 - **Make it a list** to restructure content into clean, scannable bullets
 - Or use the **prompt box at the bottom** to tell Copilot what to change or add, such as refining key points or adjusting emphasis.
4. Review the suggestions and select **Keep it** when satisfied, or regenerate to see additional options.

✓ Keep It

(Optional) Use **Regenerate** to see additional options.

< Back Regenerate AI-generated content may be incorrect  

✓ Keep it   

Demo

Pulse check

What most often causes you to avoid using Copilot in Excel?

Elevated Excel experience

Preparing your data for Excel

Before using Copilot in Excel, make sure your data is saved to the cloud and formatted as a supported table or range.

1.

AutoSave your Excel document must be saved to your OneDrive, Teams Channel, or SharePoint Online site with Autosave turned on.

AutoSave 

2.

Format as a Table. Copilot works with data that's either in an Excel Table (Insert > Table) format, or in a "Table-Like Range" with column headers.

Format as Table

3.

Click **Copilot**  in the at the bottom to analyze your data or select the **plus (+)** icon > **Edit with Copilot** to make changes to the workbook.

 Edit with Copilot

TIPS FOR SUCCESS

To use Copilot in Excel, your data needs to be in an Excel table or formatted as a supported range.

To format data as a table in Excel:

1. Select the cell or range of cells that contain your data.
2. Go to the **Home** tab and click **Format as Table**.

3. In the **Format as Table** dialog box:
 - Check the box labeled **My table has headers** if your data's first row contains column headers.
4. Click **OK**.

Format As Table

Where is the data for your table?

☒ My table has headers

To keep data as a supported range (not a table), ensure the following:

- Only **one header row**
- Headers are **only on columns**, not on rows
- Headers are **unique** (no duplicates)
- **No blank headers**
- Data is **consistently formatted**
- **No subtotals**
- **No empty rows or columns**
- **No merged cells**

- › **Ask why and how questions.** Try asking Copilot why something isn't working or how to do the task in Excel, instead of asking Copilot to do it for you.
- › **Rephrase if needed.** If Copilot doesn't seem to understand what you want, try rephrasing your prompt with different words.
- › **Prompt more than once.** Add clarification or request changes.
- › **Clarify your ask.** If you don't get what you want the first time, try saying "actually can you do XYZ instead" – that helps the model learn what you want.
- › **Start a new chat.** Note that previous prompts/responses have informed Copilot's latest response – create a new chat to start fresh.

Know which mode to use and when

Why it matters: Copilot in Excel has four distinct modes. Picking the right one saves time and avoids unexpected changes to your workbook.

Tool		Best For	How to Access
  Allow editing Copilot can edit your document directly.  Chat only Copilot will respond in chat only. ✓  	Copilot (Allow editing)	Formula suggestions, column creation, data sorting	Select Copilot at the bottom. Allow editing is enabled by default. Type an edit request.
	Copilot (Chat only)	Quick questions, summaries, formatting help	Select Copilot at the bottom. Click the caret above the prompt box and select Chat only . Type in the chat panel.
	Analyst Agent	Deep analysis: trends, outliers, correlations, visualizations	In the Copilot chat panel, select the tools icon and choose Analyst .
	Researcher Agent	Context from outside the workbook: benchmarks, definitions, industry data	In the Copilot chat panel, select the plus (+) icon and choose Researcher . You can also type @Researcher in the chat panel.

Data cleanup and reconciliation in Excel

Save hours by automating messy data cleanup and standardization.

Step 1: Edit with Copilot in Excel

1. Click Copilot at the bottom of your workbook.
2. If 'Edit with Copilot' doesn't open by default, click the plus icon and select 'Edit with Copilot'.
3. Prompt Copilot to clean and standardize the data.

Example prompt: "Clean and standardize this table. Remove duplicate rows, standardize date formats, trim extra spaces in text fields, flag missing values, and apply consistent number formatting. Keep the data in the same table and summarize the changes you made."

4. Allow time for Copilot to apply changes across the table.
5. Review the 'Data Cleanup Summary' and adjust if needed with follow up prompts.
6. Close Edit with Copilot.

Step 2: Analyst in Excel

1. In the prompt box click the plus icon (+).
2. Choose Analyst from your tools.
3. Prompt Analyst to reconcile and compare your data.

Example prompt: "Compare this table to the prior period data and identify rows that do not reconcile. Provide the formulas used, explain the logic in plain language, and summarize the key differences I should review."

4. Review the output and choose **Add to new sheet** to keep the summary.

Copilot

B. Technology_Adoption_Data – prior vs current period

Using the last two periods in the monthly data:

Metric	Prior	Current	Differe
Active Users	531	1,102	+571
Eligible Users	2,972	2,344	–628
Adoption Rate (%)	38.1	20.0	–18.1 p
Support Cost (USD)	30,973	13,036	–17,937
Productivity Gain (%)	3.4	3.7	+0.3 pt
Ongoing Investment (USD)	37,551	27,591	–9,960

+ Add to new sheet

Ask Analyst to analyze your data and generate insights

AI-generated content may be incorrect

Analysis and insight generation

Insightful by design. Let Copilot show you what drives impact.

Common problem

Data is clean, but insights take time to surface.

Step 1: Open Copilot Chat

1. Click Copilot at the bottom of your workbook.
2. Use Copilot Chat to explore trends or drivers.

Example Prompt: “Analyze this dataset and summarize key trends, outliers, and patterns. Call out anything that may require follow-up or deeper analysis.”

Step 2: Switch to Edit in Copilot to:

- Create PivotTables.
- Add charts.
- Highlight key variances or outliers.

Edit in Copilot prompt: “Create a PivotTable that summarizes this data by <insert key category> and <insert time period>. Add a chart that shows trends over time and place both on a new sheet called ‘Insights.’”

Copilot

Key trends and patterns

1) Payment status mix and concentration of overdue exposure

- Status counts
 - Paid: 93 invoices
 - Overdue: 54 invoices
 - Unpaid: 53 invoices [Invoice Data](#)
- Dollar exposure by status (sum of invoice amounts)
 - Paid: 518,208.64
 - Overdue: 263,095.02
 - Unpaid: 283,869.09 [Invoice Data](#)

Pattern to note

- Overdue dollars are meaningfully concentrated: the VTB sheet explicitly calls out that overdue variance is concentrated in

Hands-on labs

Hands-on labs (choose one scenario)

Choose one lab based on the type of work you do most often.

App: Copilot Chat

Option 1: Catch Up on What You Missed

Scenario: You were out or in back-to-back meetings and need to quickly get up to speed on what happened while you were away.

Task: Ask Copilot to summarize recent activity, surface anything that needs your attention, and identify what to prioritize first.

Option 2: Brainstorm and Refine an Idea

Scenario: You have an early idea for a project, proposal, or improvement but need help shaping it before sharing it with others.

Task: Use Copilot to brainstorm approaches, ask follow-up questions to refine your thinking, and generate a short outline you can build on.

Use Copilot in Outlook

Option 1: Summarize and Respond to a Long Thread

Scenario: A lengthy email thread has piled up with multiple questions and updates. You need to cut through the noise and reply clearly.

Task: Summarize the thread, pull out the key questions, and draft a reply that confirms the next step and timeline.

Option 2: Delegate Action Items

Scenario: You are picking up several open items, each owned by a different person with a different deadline.

Task: Draft short follow-up emails that restate what is needed, who owns the next step, and when you will check back.

Provide clarity in the title for specification in role. Delegate action items. Revising what's owned. Provide steps and prompt and follow up prompts to create a table.

Use Copilot in PowerPoint

Option 1: Build a Quick Team Update

Scenario: You need to share a brief progress update during a regular team check-in.

Task: Create a few slides showing what was completed, what is in progress, and what is blocked. Keep it to two minutes or less.

Option 2: Explain a Process Change

Scenario: A process has recently been updated, and you need to clearly communicate what has changed to your audience.

Task: Create a short presentation that outlines the updated steps, includes an example to illustrate the change, and calls out common mistakes to avoid.

Use Copilot in Excel:

Option 1: Ask Copilot About Your Data

Scenario: You are reviewing a list of ongoing work and need to quickly spot what requires attention next.

Task: Sort by status and due date, flag overdue or at-risk items, and create a view of what is due this week.

Option 2: Spot Trends and Compare Results

Scenario: You have data tracking activity over several weeks or months and need to surface what is changing.

Task: Identify key trends, compare across time periods, and write a brief summary to share.

Bonus labs

Try these optional labs to deepen your skills and explore more use cases.

Use Copilot in Word:

Option 1: Update a Document

Scenario: Something has changed in the document, and the content is outdated and hard to follow.

Task: Make modifications using **Allow editing** in Copilot. Then, use a follow up prompt to document what changes you've made to communicate to peers.

Option 2: Create a Clear Work Summary (Dictation optional)

Scenario: You need to document what was done on a piece of work so someone else can review it or pick up where you left off.

Task: Turn rough notes into a structured summary covering what is still pending, what was completed and the desired outcome of the work.

Suggestion: Written or using dictation

Use Researcher in Copilot Chat

Option 1: Clarify Updated Guidance

Scenario: Something changed in a policy or process, and you need to quickly understand what is different and what it means for day-to-day work.

Task: Use Researcher to pull together the key changes, summarize what to do and what to avoid, and flag anything that still needs confirmation.

Option 2: Evaluate Options Before Making a Decision

Scenario: You need to make a decision and want to review trusted information and compare different options before moving forward.

Task: Use Researcher to gather credible information, compare approaches or recommendations, and summarize your findings into a clear, informed recommendation.

Use Analyst in Excel

Option 1: Spot Patterns in Your Data

Scenario: You have a table of activity data with dates, categories, and outcomes, and need to understand what is happening over time.

Task: Use Analyst Agent to identify the most common categories, uncover where delays or unusual patterns occur, and highlight key insights worth sharing.

Option 2: Compare Results Across Time Periods

Scenario: You are reviewing data over time and need a simple way to compare results, spot changes, and identify anything that looks inconsistent.

Task: Use Analyst Agent to compare results across time periods, summarize the most important shifts, and highlight anything that may need attention.

Pulse check

What do you leverage
OneNote for the most?

Where Copilot Appears in OneNote

Copilot Create is your go-to tool for generating high-quality, on-brand visual content in seconds.

- OneNote Home ribbon: Copilot button
- Side panel: Chat with context from the current page or selection

Steps to start in OneNote:

1. Open a notebook and go to the relevant page.
2. Select text if you want Copilot to focus on a section.
3. Click the Copilot icon.
4. Choose a suggested action or type your own prompt.
5. Review, insert, or replace content.

Core OneNote Use Cases

This section covers the most common real-world tasks you can accomplish with Copilot in OneNote.

Each use case includes clear, step-by-step instructions that show how to summarize notes, organize ideas, rewrite content, extract action items, and transform raw information into polished outputs you can use immediately.

Use Case A

Summarize a page

1. Open a dense notes page.
2. Select the entire page or leave unselected to use page context.
3. **Prompt:** *"Summarize this page into 5 bullet points. Add one risks section and one next steps section."*
4. Review the output.
5. Click Insert below or copy and paste where needed.
6. **Follow up prompt:** *"Shorten to 120 words. Keep the next steps."*

Work

Web

Risks

- Campaign timelines may slip due to unresolved content dependencies, including SME reviews and legal approvals. Q2 Planning Notes
- Webinar delivery may be delayed or require rescheduling because of vendor capacity constraints. Q2 Planning Notes
- Elevated service request volume could impact operational responsiveness during backlog cleanup and system migration. Q2 Planning Notes

Next Steps

- Finalize the target audience and confirm owners for Q2 priorities to reduce ambiguity. Q2 Planning Notes
- Resolve marketing content blockers by securing SME input and legal reviews. Q2 Planning Notes
- Confirm webinar plans and assess alternative vendors or dates if capacity remains limited. Q2 Planning Notes
- Prepare operational support plans for the facilities ticketing tool migration and ongoing service volume increases. Q2 Planning Notes

If you want, I can also convert this into an executive-ready slide, a one-page brief, or an owner-based action table.

Convert this into an executive-ready slide

Create an owner-based action table

Draft an email summarizing these points

Shorten to 120 words. Keep the next steps

Use Case B

Create an outline from raw notes

1. Open brainstorming notes.
2. **Prompt:** *“Create a clear outline from these notes with three main sections and sub-bullets. Title each section.”*
3. Insert and fine-tune
4. **Follow up prompt:** *“Add time estimates to each section.”*

Work

Web

1. Planning, Priorities, and Governance Gaps

- Next quarter planning is not finalized, creating uncertainty across teams
- Multiple teams are waiting for clarity on priorities and timelines
- Messaging on timelines is inconsistent
- Content teams have requested updated templates
- Ownership of final approval is unclear
- Project delays are occurring due to unclear governance and access issues

2. Intake, Tracking, and Visibility Challenges

- Administrative teams struggle to track incoming requests
- Tracking methods vary across teams, including spreadsheets, email folders, and Teams chats
- There is no shared or standardized intake process
- Leadership lacks clear visibility into pending work and ownership
- Weekly summaries differ by department and are not consistent

3. Technology, Training, and Process Issues

- Recent technology updates have caused minor disruptions
- M365 training materials are overdue for refresh
- Some staff continue to use outdated file naming conventions
- Dashboards are missing recent vendor metrics

Add a section on action items

Provide recommendations for each section

Include a summary at the end

Message Copilot

Use Case C

Rewrite for clarity and tone

1. Select a messy paragraph
2. **Prompt:** *"Rewrite this in clear, plain language. Keep key facts. Audience is leadership."*
3. Insert revised text
4. **Follow up prompt:** "Make it more concise. Keep the call to action."

Work

Web

Make it more concise. Keep the call to action

Here is a more concise version with a clear call to action, written for leadership:

Concise rewrite

The rollout is progressing unevenly, with confusion around current instructions and inconsistent adoption across teams. The template and single source of truth link remain under review, which is delaying communication and increasing questions. Metrics are not yet ready. To avoid missing the launch window, we recommend proceeding with an initial communication this week, pending Legal approval.

Provide a shorter executive summary

Highlight the risks and recommended next steps

Draft an email to leadership with this information
