

PROFESSIONAL SUMMARY

Versatile Mainframe Developer with 3+ years of experience in COBOL, CICS, DB2, and VSAM environments. Proven expertise in L3 production support, incident resolution, and mainframe application development. Proficient in Java, JavaScript, C++, SQL, and API testing with Selenium automation. Achieved \$45K annual cost savings through innovative tool development. Strong background in Agile methodology

PROFESSIONAL EXPERIENCE

Associate Software Engineer

Carelon Global Solutions

July 2023 – Present

Delhi, India

- Developed mainframe applications using COBOL, JCL, DB2, CICS, VSAM in production environments
- Provided L3 production support for critical applications, handling incident resolution and problem management
- Created Mainframe Job Flow Viewer tool, reducing analysis time from 25 minutes to 45 seconds (\$45K annual savings)
- Implemented automated txt-to-excel reporting solutions using Java adhoc requirements
- Developed AI-powered COBOL code generation prompts for efficient job creation and development tasks
- Collaborated with offshore/onshore teams using Agile methodologies and DevOps practices
- Utilized GitLab and Endeavour for version control and production deployments
- Received multiple Impact Awards for production support excellence and team collaboration
- Optimized SQL queries and database performance for improved system efficiency

EDUCATION

B.Tech Computer Science

Galgotias University

2019 – 2023

U.P., India

First Class with Distinction - 84.9%

KEY ACHIEVEMENTS

- Cost Optimization

\$45K annual savings through tool development (97% time reduction)
- Recognition

Multiple Impact Awards for production support and collaboration excellence
- Innovation

AI-powered automation tools and process improvement solutions

TECHNICAL SKILLS

- Mainframe Technologies

 - COBOL Programming
 - JCL (Job Control Language)
 - DB2 Database Management
 - CICS Transaction Processing
 - VSAM File Management
 - TSO/ISPF
 - CA7 Job Scheduling

- Development Tools

 - GitLab Version Control
 - Endeavour Source Control
 - CMOD Content Management
 - Postman API Testing

- Support & Operations

 - L3 Production Support
 - Incident Resolution
 - Problem Management
 - Change Support
 - Performance Monitoring

- Methodologies

 - Agile Development
 - DevOps Practices
 - ITIL Framework
 - IT Service Management

- Programming Languages

 - Java Development
 - JavaScript
 - C++ Programming
 - SQL Database Queries

- Testing & Automation

 - Selenium WebDriver
 - API Testing
 - Automated Testing
 - Performance Testing
