

TOGAF Enterprise Architecture Foundation

Course Objectives

- The foundation of the learning path for Enterprise Architecture
- The fundamental concepts
- A basic understanding of Enterprise Architecture using the TOGAF approach
- Individuals who need a basic understanding of a proven Enterprise Architecture methodology
- Individuals who work for or join an organization applying the TOGAF Standard
- Individuals who need to start to learn the TOGAF method

The case study is used throughout the classroom session to explain or reinforce the learning points.

NB: - *Please note: - This course focusses at Foundation Level and Preparation for Certification with lots of examples and hands-on activities*

TOGAF® is the registered trademark of The Open Group in the United States and other countries

Course Content

Introducing the concepts of Enterprise Architecture and the TOGAF Standard, including:

- What an enterprise is
- The purpose and benefits of Enterprise Architecture
- The TOGAF Standard as a framework for Enterprise Architecture
- The four architecture domains
- Architecture abstraction
- The Enterprise Continuum
- The Architecture Repository
- The TOGAF Content Framework and Enterprise Metamodel
- Architecture Capability
- Risk Management
- Gap Analysis

Understanding the Architecture Development Method (ADM), the purpose and objectives of each phase, including how to adapt and scope the ADM for use. Topics include

- The ADM and its phases
- Draft and Approved status for deliverables
- The iterative approach of the ADM
- The need to govern Enterprise Architecture
- How to scope an architecture
- Alternatives and trade-offs
- The purpose and objectives of each of the ADM phases
- How architecture can be applied to support Agile software development

Introducing techniques available to support the application of the ADM. Topics include:

- How the ADM and Supporting Guidelines and Techniques relate to each other
- Architecture Principles
- Business Scenarios
- Gap Analysis
- Interoperability
- Business Transformation Readiness Assessment
- Architecture Risk Management

Introducing the guidance available to support application of the ADM, including use of iteration, partitioning, Agile delivery, and application in a digital enterprise. Topics include:

- Where guidance is available
- How iteration within the ADM enables concurrent operation
- The Architecture Landscape
- Purposes to frame Architecture Projects
- How the TOGAF Standard can be applied to support the digital enterprise

Understanding how Architecture Governance contributes to architecture development. Topics include:

- The concept of Architecture Governance
- Why Architecture Governance is beneficial
- The role and responsibilities of an Architecture Board
- Architecture Contracts
- Architecture Compliance

Understand which outputs can be produced while executing the ADM. Topics include:

- The concepts of stakeholders, concerns, architecture views and architecture viewpoints
- Architecture Building Blocks (ABBs)
- Architecture deliverables
